"Fears about its quality increase": BYD recalls 115,000 electric cars over battery problems.

Read more: <https://shorturl.at/BuLaB>

BYD, the world's largest electric vehicle manufacturer, is recalling more than 115,000 vehicles in its crucial domestic market due to technical defects, raising concerns about quality control amid the Chinese giant's rush to keep costs low.

The two separate recalls, which affect both hybrid and fully electric models, follow official investigations by the State Administration for Market Regulation, according to a statement released by the regulatory agency on Friday.
